# PELLAROSE

Photography · Digital & Mixed Media

When you look at Pellarose's work for the first time, a question arises: is this photography or painting? Reality or vision? That very uncertainty is the essence of his art. He doesn't simply take pictures — he deconstructs reality and rebuilds it through an extraordinary command of colour and light. The unique works in this exhibition are Digigraphies — digital compositions printed to museum standard and enhanced by hand with acrylic and pastel interventions. Each piece exists once in the world. No reproduction is possible.
